

GS1 US Data Hub 5.0 | RELEASE NOTES

Data Hub Release 5.0 supports GS1 US subscribers by helping them to identify, create, manage, use, and verify product and location data through one convenient, data-sharable platform. The two main enhancements in this release include the support for individually licensed single GTINs and the introduction of the product create/manage API. Additionally, the release includes user requested changes and needed corrective actions.

ENHANCEMENTS

Data Hub|Product

- Support for individually licensed single GTINs is added to Data Hub
- A new Data Hub|Product Create/Manage "MyProduct" API has been added
 - CCPs can manage Brand Owner products with the MyProduct API with the permission of the brand owner
- The product import template has been improved with pull-down menus to reduce user errors
- Product View/Use API will now search records in the GS1 Registry Platform
- Product Searches to the GS1 Registry Platform have been augmented with a VbG completeness check and enhanced company information

CORRECTIVE ACTIONS

Access

- Issues with Google browser cookie policies have been resolved

Data Hub|Location

- 'Import as Approved' capability for Location Import has been fixed
- Warning message buffer overflows, which inhibited large location imports, have been fixed
- The GLN Index (no longer supported by Global Office) has been removed

Data Hub|Product

- Issues with Product searches using GTIN12 and GTIN13 identifiers have been resolved
- User warnings have been added to the 'Is this item variable measure?' button in the Product>Create detail screen to reduce errors
- Unit of Measure (UoM) codes have been augmented and the drop-down menus have been enhanced
- Minimum attributes required to get a barcode are now clearly designated with red text
- Issues with the import of large files with upper-level-packaging have been mitigated
 - User guidelines have been added to documentation to eliminate these issues

User Guides and Help Bubbles

- All impacted User Guides, Help Bubbles, etc. are refreshed and posted to the Help Center
- Acceptable Codes for Country (Target Market), Language, and UoM have been updated in the Product Create Manage User Guide as Appendices to assist Data Hub Users
- A new Users Guide is being added to assist user with the "MyProduct" product create/manage API

REMOVALS

Product

- "Photo" support is being discontinued and Brand Owners will now provide links to their images through the "ImageURL" attribute
